

# Beeswax Wraps

---

**This recipe will produce 3 x 20cm square wraps**

## **Ingredients:**

60g Beeswax - grated

1.5 teaspoons Jojoba Oil

100% Cotton Fabric (very thin – try your local op-shop!)

## **Method:**

1. Preheat Oven to 100 degrees Celsius
2. Mix together Jojoba Oil & grated Beeswax
3. Lay baking paper onto a baking sheet, then place your fabric on top. Sprinkle the beeswax/jojoba oil mixture evenly over the top.
4. Place sheets in the oven and bake until the wax is melted. This should take 5-10 minutes.
5. Using a paintbrush, quickly spread the oil/wax mixture evenly into the fabric. Place the sheets back in the oven for another minute to finish them.
6. Remove the sheets from the oven. Lift from the sheet using a pair of tongs and wave it through the air to cool slightly (so you can touch it).
7. Hang the wraps on a line using a clothes peg until fully cooled.

To use your wraps simply form them to your bowl/container and use the warmth of your hands to adhere it.

After 6 months or so your wraps may start to degrade. Simple repeat step 4 to reimpregnate the wax and oils into the fabric.

To wash your wraps simply use a small amount of soap, cold water and a brush. Gently scrub and then pat dry with a tea towel.

**We do not suggest using Pine Resin (aka Pine Rosin) – it releases toxic chemicals when heated is not necessary for good wax wraps.**
